Teaching projects

Project and Rationale

Aim: Use the whole school focus on meta-cognitive teaching and learning strategies to accelerate student progress and raise attainment.

Activity: Appoint 7 x Metacognition Champions (SA1) to lead the development of metacognitive practice across all faculties.

Cost: £19,000

Expected Outcome

Quality first teaching will narrow and then eliminate the gap in outcomes between Jersey Premium and Non-Jersey Premium Students at KS4 & 5.

Spend £19000 – 7 champions were appointed are in post until the end of this academic year. They have promoted MC across faculties and have led CPD. MC is still the focus of teaching and learning strategy to close the attainment gap and is becoming more firmly embedded in planning. Notably JP attainment outcomes in KS4 were skewed by the data of one student in a small cohort but were otherwise very promising. At KS5 the gap was all but closed, and there was a 10% rise in JP student application to university.

Project and Rationale

Aim: Use the whole school focus on meta-cognitive teaching and learning strategies to accelerate student progress and raise attainment.

Activity: CPD identified and delivered for Metacognition champions to enable them to lead the development of metacognitive practice across all faculties.

Cost: £8,000*

*dependent of Covid-19 travel restrictions

Expected Outcome

School evaluation activities provides evidence of effective meta-cognitive teaching and learning.

Spend £7,787.32 – Whole school CPD (online) on Meta Cognition through Exeter Uni partnership with Thinking Schools. CPD also took place in partnership with Durrington High School and Elevate were used as part of an ongoing programme, to deliver learning and revision strategies to all year groups. The student feedback to Elevate was above 98% positive.

Project and Rationale

Aim: Use the whole school focus on meta-cognitive teaching and learning strategies to accelerate student progress and raise attainment.

Activity: To provide all staff with metacognition training and time to embed metacognition into the curriculum.

Cost: £2,000

Expected Outcome

School evaluation activities provides evidence of effective meta-cognitive teaching and learning.

Improved valued added progress and attainment in KS4 core subjects and ALPS grade 2 or higher at KS5 for Jersey Premium Students.

Spend £0000 – In House INSET enabled School evaluation activities, which are now seeing evidence of MC strategies, particularly in Y10 – 12. It is less so in Y13 with some depts focusing on it more than others. Equally many Y13 students already have an MC mindset. There was no Value-Added progress recorded this year in KS4, but our ALPS grade was recorded as 1 which puts Hautlieu in the top 1% of similar schools who are enrolled in the programme.

Wider Strategies

Project and Rationale	Expected Outcome
Aim: To ensure that all students are ambitious and have high aspirations and are provided with opportunities to access cultural capital through participation in extra-curricular opportunities and student leadership. Activities:	The numbers of JP students applying for 18+ opportunities are proportionate to Non-JP students (Gap currently sits at 26% for Non JP/JP students applying for university). Spend £776 – this spend was less than
 Audit students' aspirations for 18+ and barriers to succeeding. Support students in visiting universities/accessing virtual opportunities. Explore opportunities for students to raise their aspirations. Arrange for Skills Jersey meetings and meetings to raise awareness to support. Cost: £7,500	anticipated because of COVID travel restrictions. However, we were able to assist some Y13s with travel and accommodation to university visits, and our current gap for application has been reduced to 10%. We will continue this strategy in the coming year. For those students who did not want to apply we were able to help some with the appropriate attire for interview.
